Weekly SEO Performance Report

sc-domain:clearleaff.com · 2026-09-28 to 2026-10-04 vs 2026-09-21 to 2026-09-27

CLICKS	IMPRESSIONS	CTR	AVG POSITION
8	237	3.38%	22.9
-1 vs last wk	+46.3%	-2.18 pp	-10.0 pos

Key takeaways

- Impressions +46.3% (162 → 237), clicks 9 → 8. Growth came mostly from deep rankings: 70% of visible-query impressions are now beyond position 20 (was 56%). Avg position (12.8 → 22.9) fell through this mix; individual queries: 0 improved, 0 declined.
- Brand queries drive 3 of 8 clicks; non-brand queries drive 0 clicks from 100 impressions. 5 clicks (63%) come from anonymized queries that GSC does not list.
- Biggest non-brand topic: "agentic" with 50 impressions over 10 queries, avg position 51.8 (mostly beyond page 2), 0 clicks.
- Commercial-intent queries are 17% of visible impressions (18) and 0 clicks.
- /resources/blogs has the most impressions (110, 0 clicks); / (home) earns the most clicks (8).
- Low volume: only 17 clicks across both weeks, so treat percentage changes as directional, not conclusive.

Who finds you, and for what

Brand vs non-brand

Brand terms are set in Config. Non-brand clicks are the number to grow.

Segment	Clicks	Impr.	Impr. change
Brand queries People who already know you	3 (prev 3)	5 (prev 4)	+25.0%
Non-brand queries New audience: this is real SEO growth	0 (prev 1)	100 (prev 32)	+212.5%
Anonymized (hidden by GSC) Rare queries Google does not list	5 (prev 5)	132 (prev 126)	+4.8%

Search intent (funnel stage)

Rule-based keyword matching (editable in Config). Commercial queries are the ones closest to leads.

Intent	Queries	Impr.	Share	Clicks
Brand e.g. cleaff	1	5	5%	3
Commercial e.g. engineering services case studies, high tech industry case studies, engineering services case study	10	18	17%	0
Informational e.g. datafusion vs polars, polars use cases, polars vs datafusion	5	19	18%	0

Other / topic e.g. agentic sdlc, agentic ai in sdlc, agentic ai sdlc	22	63	60%		0

Top countries

Set targetCountries in Config to track your target-market share.

Country	Impr.	Share	Clicks	Pos.
United States	115	49%	0	30.6
India	18	8%	8	12.2
Germany	11	5%	0	17.2
United Kingdom	11	5%	0	25.4
CHE	7	3%	0	24.7

Content sections

Pages grouped by URL path. Shows which content type earns search visibility.

Section	Pages	Impr.	Clicks	CTR	Pos.	Impr. change
/resources/blogs	13	110	0	0.00%	5.2	+8.9%
/resources/ebooks	1	62	0	0.00%	43.1	+785.7%
/resources/casestudies	7	37	0	0.00%	52.4	+5.7%
/ (home)	1	20	8	40.00%	2.5	-9.1%
/resources/glossary	5	7	0	0.00%	24.9	new
/about	1	4	0	0.00%	4.3	-55.6%
/open-source	1	3	0	0.00%	5.0	-40.0%
/tech-radar	1	3	0	0.00%	5.7	+50.0%
/agents	1	2	0	0.00%	2.0	0.0%
/contact-us	1	2	0	0.00%	4.5	-60.0%

Topic clusters (non-brand)

Queries grouped by their strongest shared keyword (or your own topics in Config). Shows where you have topical visibility.

Topic	Queries	Impr.	Clicks	Avg pos.	Impr. change
agentic agentic sdlc, agentic ai in sdlc, agentic ai sdlc	10	50	0	51.8	+1566.7%
polars datafusion vs polars, polars use cases, polars vs datafusion	3	17	0	3.2	+112.5%
engineering engineering services case studies, engineering services case study, document engineering case study	6	12	0	84.8	+200.0%
(one-off queries) high tech industry case studies, docker vs buildpacks for monorepo deploys, case studies legacy factory ai integration	8	10	0	55.3	-9.1%
sdlc software development lifecycle sdlc, "software development lifecycle (sdlc)	2	3	0	19.0	new
data natural language data discovery, ai-powered data discovery solutions	2	2	0	47.5	-50.0%

generation visual content generation for enterprise, retrieval augmented generation	2	2	0	60.5	+100.0%
radar technology radar, thoughtworks radar	2	2	0	4.5	new
analytics ai analytics case studies	1	1	0	67.0	0.0%
datafusion apache datafusion	1	1	0	5.0	new

Visibility and movement

Visibility mix by position

Impressions of visible queries per position bucket. Explains average-position changes: more deep-ranking queries pull the average down even if nothing dropped.

Position	This week	Impr.	Last week	Impr.	Queries
1-3		11		11	3 (prev 6)
4-10		17		4	7 (prev 2)
11-20		3		1	2 (prev 1)
21-50		21		11	10 (prev 5)
51+		53		9	16 (prev 9)

Ranking movement

Improved/declined = average position moved by at least 2 positions, items with 5+ impressions in both weeks. Movement is ignored when both weeks are deeper than position 30.

	Pages	Queries
▲ Improved	**0**	**0**
▶ Stable	**4**	**0**
▼ Declined	**1**	**0**
★ New	**1**	**1**
✕ Lost	**0**	**1**

Opportunities and fixes

Striking distance: best ranking upside

Non-brand queries at positions 4-30. "Est. extra clicks" = impressions x (benchmark CTR at position 3 minus at current position). It uses a generic CTR curve, so treat it as a rough guide.

Nothing this week.

CTR below benchmark

Queries in the top 10 getting less than half the clicks a typical result at that position gets (only where the benchmark predicts 2+ clicks). Check title, meta description, and whether the page matches the intent.

Nothing this week.

Possible cannibalization

Queries where 2+ of your pages get impressions. Consider consolidating or differentiating the pages.

Nothing this week.

Movers

Biggest ranking improvements (queries)

Nothing this week.

Biggest ranking drops (queries)

Nothing this week.

New queries

No impressions last week, visible this week.

Query	Impr.	Clicks	Pos.
agentic ai in sdlc	5	0	39.6

Lost queries

Had impressions last week, none this week.

Query	Prev impr.	Prev clicks	Prev pos.
seedlify case studies	5	0	31.4

Pages

New pages with clicks

Zero clicks last week, clicks this week.

Nothing this week.

Pages gaining ranking

Nothing this week.

Pages losing ranking

Page	Prev pos.	Pos.	Change	Clicks
/resources/ebooks/agentic-ai-in-sdlc	25.6	43.1	-17.6	0

Pages gaining most clicks

Page	Prev clicks	Clicks	Change	Impr.
/	5	8	+3	20

Pages losing most clicks

Page	Prev clicks	Clicks	Change	Impr.
/resources/blogs	1	0	-1	0
/resources/blogs/polars-vs-datafusion-performance-features-use-cases	1	0	-1	29
/resources/blogs/rayon-in-rust-how-threading-works-and-when-you-should-never-use-it-as-an-accelerator	1	0	-1	51
/resources/casestudies/ai-assisted-creative-production	1	0	-1	0

Query reference

Top queries by clicks

Query	Clicks	Impr.	CTR	Pos.	Clicks change
cleaff	3	5	60.00%	2.8	0

Top queries by impressions

Query	Impr.	Clicks	CTR	Pos.
agentic sdlc	28	0	0.00%	58.9
datafusion vs polars	9	0	0.00%	3.6
cleaff	5	3	60.00%	2.8
engineering services case studies	5	0	0.00%	83.2
polars use cases	5	0	0.00%	1.8
agentic ai in sdlc	5	0	0.00%	39.6
agentic ai sdlc	4	0	0.00%	39.5
polars vs datafusion	3	0	0.00%	4.3
agentic ai for sdlc	3	0	0.00%	30.0
agentic ai software development lifecycle	3	0	0.00%	60.7

Best ranking queries (position 1-3)

Sorted by clicks.

Query	Pos.	Clicks	Impr.	CTR
cleaff	2.8	3	5	60.00%
polars use cases	1.8	0	5	0.00%

AI recommendations

Written by Gemini from the data in this report. Title and meta lines are suggestions only (the live titles were not checked). Verify before applying.

Improve CTR / clicks

datafusion vs polars High

/resources/blogs/polars-vs-datafusion-performance-features-use-cases · pos 3.6 · 9 impr. · 0 clicks · benchmark ~0.6 clicks · **potential +0.6/wk**

High ranking position of 3.6 but zero clicks.

Title ideas

- Datafusion vs Polars: Performance & Key Differences
- Polars vs Datafusion: Which Query Engine to Choose?

Meta idea

Compare Datafusion vs Polars performance, features, and use cases to choose the right engine.

Other actions

- Add a comparison table at the top of the page.
- Implement FAQ schema to capture rich snippets.

polars use cases High

/resources/blogs/polars-vs-datafusion-performance-features-use-cases · pos 1.8 · 5 impr. · 0 clicks · benchmark ~0.8 clicks · **potential +0.8/wk**

Top ranking position of 1.8 but zero clicks.

Title ideas

- Polars Use Cases: When to Use Polars Over Datafusion
- Polars in Production: Key Use Cases and Examples

Meta idea

Discover the best Polars use cases, performance benefits, and when to choose it.

Other actions

- Add a dedicated section for Polars real-world use cases.
- Use bullet points for readability in search snippets.

Grow impressions on key pages

pages whose impressions grew >= 50% vs previous week

/resources/ebooks/agentic-ai-in-sdlc Medium

62 impr. (prev 7, +785.7%) · pos 43.1 · 0 clicks

Strong impression growth but low average position and no clicks.

Target queries: agentic sdlc, agentic ai in sdlc, agentic ai sdlc, agentic ai for sdlc, agentic ai software development lifecycle

- Add internal links from related AI and software development blog posts.
- Create a dedicated FAQ section targeting agentic SDLC queries.
- Optimize the page header to target agentic AI in software development lifecycle.

/resources/blogs/building-incremental-data-pipeline-with-airflow-bigquery Medium

10 impr. (prev 5, +100.0%) · pos 4.9 · 0 clicks

Low impressions but high average position with zero clicks.

- Add internal links from other Airflow or BigQuery articles.
- Include a step-by-step code snippet for incremental pipelines to target rich snippets.

Source: Google Search Console. All figures are computed with fixed rules; only the "AI recommendations" section is generated by Gemini. Position change = previous minus current (positive = better). Avg position is impression-weighted. GSC hides anonymized queries, so query-level sums are lower than totals. Estimates use a generic CTR benchmark.
